

WORLD LANGUAGE TEXTBOOK ADOPTION REPORT

The 2016 Mississippi World Languages Framework describes what students should know and be able to do in world languages other than English. The framework provides an outline of what students will need in preparation for life in a culturally diverse world. School districts should use the levels of study in this framework as a basis for course curriculum development. The curriculum should be designed to address the Standards and Competencies listed in the level of study. The framework is divided into three major sections that each have their own set of Standards and Competencies. Modern spoken language courses are included in the first section. These might include, but not be limited to Spanish, French, German, Russian, Italian, Chinese, or Japanese. Classical languages such as Latin are included in the second section.
